

Features of the Hidden WiFi Dash Cam

1. WiFi Connectivity: Enables wireless connection to smartphones and other devices for easy access and control.
2. Loop Recording: Continuously records and overwrites the oldest footage to ensure continuous recording without manual intervention.
3. Wide-Angle Lens: Equipped with a 140-degree wide-angle lens to capture a broader view of the road.
4. APP Smart Phone Connection: Allows viewing and managing recordings via a dedicated smartphone app.
5. Gravity Sensor: Built-in triaxial stereo collision acceleration sensor for detecting impacts and automatically saving important footage.

Technical Features of the Hidden WiFi Dash Cam

1. Resolution: Supports multiple resolutions, including 23041440, 19201080P, and 1280*720P for high-quality video recording.
2. Master Chip: Utilizes the GK 7202+3238 chip for efficient processing and performance.
3. Video Format: Records videos in H264 compression MOV format, which balances quality and storage space.
4. Temperature Range: Operates within a wide temperature range of -20°C to 75°C, ensuring functionality in various climates.
5. Memory Card Support: Compatible with memory cards ranging from 2GB to 128GB, requiring Class 10 or higher for optimal performance
