BSD Camera TL-BSD-EF2 SPEC

Feature:

1. Built-in high-performance SigmaStar Image chipsets, coded with H.265/H.264 standard
2. 4 CH 1080P live preview and storage with 1CH synchronized AV output
3. Support UPS power input, image mirror adjustment, and reversing image assistance
4. Unique GPS drift suppression algorithm, supporting GPS/BD optional
5. High compression rate and image quality with a 90-degree rotation option

Technical Feature:

1. Professional vehicle power supply 9-36V DC wide voltage with low voltage and short circuit protection
2. Special file management system to encrypt and protect data, proprietary technology for SD card longevity
3. Built-in super capacitor to avoid data loss and SD card damage, supporting up to 512G SD card storage
4. Embedded Linux OS with GUI and mouse support, Chinese/English/Russian languages
5. High sensitivity, fast positioning GPS/BD support with detection for antenna plug-in/unplug/short circuit
